Nimbus Labs - IT Security Policy (2026)

1. Passwords and login

Passwords must be at least **14 characters** long and must not reuse any of your last 5 passwords. Passwords are changed only when there is a sign of compromise; there is no forced 90-day rotation.

Multi-factor authentication (MFA) is mandatory for email, VPN, the HR portal and all cloud consoles. Use the Microsoft Authenticator app; SMS codes are not accepted.

Never share your password with anyone, including IT staff. IT will never ask for it.

2. Laptops and devices

Laptops must lock automatically after **5 minutes** of inactivity. Full-disk encryption (BitLocker or FileVault) must stay switched on at all times.

USB storage drives are **blocked** on company laptops. Use OneDrive or the approved file-transfer tool instead.

A lost or stolen laptop or phone must be reported to the IT helpdesk within **2 hours** so it can be wiped remotely.

3. Working remotely

The company VPN must be used whenever you work from public Wi-Fi such as cafes, airports or hotels.

Do not let family members or friends use your company laptop.

4. Phishing and incidents

Report suspicious emails using the **Report Phishing** button in Outlook, or forward them to security@nimbuslabs.example within **1 hour** of receiving them. Do not click links or open attachments.

For any security incident, call the 24x7 security hotline on extension **4444**.

Employees who report a real phishing email within 1 hour are entered into a monthly gift-voucher draw.

5. Data classification

All company data is labelled as one of four levels: **Public**, **Internal**, **Confidential** or **Restricted**.

Restricted data (customer encryption keys, salary data, health records) may only be stored in the approved vault and must never be sent by email or chat.

Confidential documents shared outside the company must be sent as password-protected links that expire in 7 days.

6. Violations

Breaking this policy may lead to loss of system access and disciplinary action, up to termination of employment.
